

STANDARD FEATURES

- Stainless Steel Construction
- Foam Insulated
- Insulated Sliding Cover
- Convection Blower
- Factory Set Internal Temperature Controller
- Safety Shut-Off

Greco Brothers Lab Style dryers are built with many of the same features as our industrial-sized dryers, but with smaller heated chambers. Their modest overall size makes these systems ideal for testing laboratories and other facilities with low production requirements.

Foam-insulated, double-walled heavy-duty stainless steel construction ensures quick heat up time and long equipment life. The air in the drying chamber is continuously circulated, so unlike other dryers, which exhaust-large amounts of hot air, these drying systems offer greatly reduced energy costs. Best of all, these systems are competitively priced and built to the high standard of quality you've come to expect from Greco Brothers.

LAB STYLE OPTIONS & ACCESSORIES

Nominal Filtration

An aluminum wound filter is located in the air stream to keep the drying chamber free from airborne particles.

HEPA Filtration

A removable HEPA filter element is installed in a stainless steel HEPA-seal housing within the cabinet. Housing has a quick-clamp system for easy element changes.

SPECIFICATIONS					
Model	Heated Chamber	Overall Dimensions	Power Requirements	Filtration	Heat Input
LS4-2	16" x 15" x 20"	38" x 31" x 38"	240V/1PH-10A	Nominal Optional	2.2 KW
LS4-2H	16" x 15" x 20"	38" x 31" x 38"	240V/1PH-10A	HEPA	2.2 KW
Filtration option reduces chamber dimensions by 1" Design specifications for standard models are subject to change without notice.
